

# Summit Project Plan

---

**Project Title**

Parents as Partners

**District/  
Organization**

New Lisbon School District

---

## Project Description

The project will focus on building family, community, and school partnerships to enhance student achievement and graduation outcomes. The group will focus on building an understanding from existing data to determine initiative effectiveness. They will use research from Wisconsin FACETS (Leading by Convening) to develop an action plan. Teachers will be involved in the collection of data, review of plan, and will be included in the revision process.

Measures of success for the project include: increased attendance at Parent-Teacher-Child Meetings, parent involvement in our professional learning communities, increased staff awareness of effective ways to address student and family needs related to educational concerns, surveys for parent/teacher/student to measure a variety of elements around parent and school partnerships, and increased attendance at Family Literacy Nights.
